Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

As applicant pointed out under Remark section, pages 15-17, Johnston U.S. Patent 6,104,391 taken either singly and/or in combination with other cited prior arts, do send the message to a centralized extensible behavior stack to check for one or more behaviors to use in processing the message, wherein a behavior describes the manner in which the user interface components or the visual user interface development tool processes the message resulting in a user interface activity dependent upon the behavior such that the functionality of the user interface components or the visual user interface development tool is defined by the behavior; check the centralized extensible behavior stack containing currently available behaviors for processing messages to determine if a behavior is available to process the message; and if a behavior is available on the centralized extensible behavior stack, then passing the message to the available behavior for processing thereby resulting in a dynamically defined functionality and appearance of the interface and wherein no behavior is available on the centralized extensible behavior stack for processing the message, the method or computer executable instructions further comprising an acts of: checking for a successfully hit tested glyph with a corresponding glyph behavior for the message; and if available, passing the message to the glyph behavior of the successfully hit tested glyph, as recited in such manners in each of independent claims 1, 9, 19, 27 and 37.

Prior arts of record do not teach and/or suggest these claimed limitations, thus, all remaining pending claims 1-6, 8-13, 15-21, 24-29 and 31-43 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
